# Aviation Safety Seminar

Sponsored by the Tri-Cities Washington Pilots Association

## "Is Your Aircraft Airworthy and SAFE?"

Information for the Owner/Renter Pilot

Topic: What the pilot must know to keep his/her airplane airworthy and safe.

Is your aircraft airworthy? Is it safe? Would you (should you?) trust your life to it? Learn what the FARs require. What should owners and renters look for during the pre-flight? If you own the airplane, how can you tell when your bird is legal, well maintained, and above all, **safe**? This seminar can save you money, help you keep your plane "legal", and above all, keep it in a safe condition to carry you and your passengers into the wide blue yonder.

Our speaker, Jim Faustina, is the Director of Safety and Education for the WPA. Jim is an A&P and AI who has many years of experience working on all general aviation aircraft.

Date: Saturday, November 22, 2008

10:00 a.m. till noon

Location: Pasco, WA

Columbia Basin College

CH2M Hill and Technology Education Center (Building W)

(Corner of 20th & Argent) Room W-132
